

MM100s

Weatherproof Marine Source Unit

Position:

A premium, single-chassis marine source unit.

SUMMARY:

Superb audio performance, excellent ergonomics and advanced audio features, specifically designed for marine applications.

SELLING POINTS:

#1 Engineered for real-world marine duty

- Weatherproof (IP66 rated) design and construction
- Easy-to-read, high-brightness, 3.5-inch full-color LCD display with separate day/night lighting modes
- Easy-to-use, large controls for marine/powersports applications
- Intuitive interface with large text for easy legibility while in motion
- Independent, user settings for display brightness, button brightness and remote brightness (optional)

#2 Flexible zone controls tailored for marine audio system configurations

- 8-channels of audiophile quality, 4V RMS preamp level outputs
- 4 separate audio zones with independent feature/control options:
 - Main Audio Zone** features bass, midrange, treble and balance controls.
 - Audio Zone 2** is a full-range zone with independent bass, midrange, treble and balance controls, plus absolute or relative volume control.
 - Audio Zone 3** can be assigned as a Subwoofer Level control or as a full-range zone with independent bass, midrange, treble and balance controls, plus absolute or relative volume control.
 - Audio Zone 4** is a fixed level zone.
- Audio zones 1-3 feature a zero-clipping audio circuit design, with self-limiting tone controls to prevent speaker system damage.

#3 Built for today's modern media with multiple connectivity options

- Digital AM/FM tuner with NOAA weatherband capability
- RDS (Radio Data System) displays extended FM program info, where available
- SiriusXM-Ready™ (tuner, antenna, and subscription sold separately)
- Store up to 18 preferred channels, programmable across all tuner bands
- Bluetooth® with aptX® codec streams top-quality audio from compatible devices
- USB 2.0 direct-digital connection accesses music files on your USB storage device or compatible iPhone®
- Conveniently charges phone or media player with 1.0 amp USB output
- Analog auxiliary inputs accept audio signals from a wide range of audio sources
- NMEA 2K compliant
- Connect up to three MMR-20 Wired Remotes (sold separately) to add remote control functionality from extended vessel locations (up to 75 ft. away).
